Professional Summary

Frontend Software Engineer with **3+ years of experience** building scalable, high-performance web applications using React.js, Next.js, and TypeScript. Delivered production frontend solutions for international clients across enterprise platforms, business management systems, and customer-facing products, improving Core Web Vitals by up to 30% through rendering and asset optimization. Experienced in architecting maintainable, component-driven frontend applications, integrating REST APIs and AI-powered capabilities, and translating complex business requirements into responsive, accessible user experiences. Owns the complete frontend lifecycle from planning and development through testing and deployment in Agile environments.

Technical Skills

Core: React, React.js, Next.js, TypeScript, JavaScript (ES6+), Node.js, HTML5, CSS3

Frontend: Tailwind CSS, Material UI (MUI), ShadCN UI, Zustand, Redux, Context API, TanStack Query, React Hook Form, Component Libraries

Performance & Architecture: SSR, SSG, Code Splitting, Lazy Loading, Image Optimization, SEO, Responsive Design, Web Accessibility (a11y), Cross-Browser Compatibility

API & Integrations: REST APIs, RESTful API Design, OpenAI API, GoogleGenAI, Socket.io, Firebase (Push Notifications), Stripe, DocuSign, Google Analytics

Tools & DevOps: Git, GitHub, GitHub Actions, CI/CD, Docker, Figma, VS Code, Cursor, Jira, Trello

Testing: React Testing Library, Unit Testing, Yup, Zod

Methodology: Agile, Scrum, Code Reviews, Version Control

AI Tools: Claude AI, Cursor AI, GitHub Copilot, Lovable

Professional Experience

Frontend Software Engineer – Vivansh Infotech Pvt Ltd, Ahmedabad

January 2023 – Present

- Led frontend development across **7+ client projects**, delivering production-ready applications using React.js, Next.js, and TypeScript.
- Collaborated closely with designers, backend teams, and stakeholders to transform business requirements into responsive and user-friendly interfaces.
- Improved Core Web Vitals (LCP, CLS) by **25–30%** across multiple production applications through code-splitting, lazy loading, and asset optimization.
- Implemented scalable SEO strategies, structured metadata, and routing solutions for customer-facing platforms, improving organic search visibility by **20%**.
- Shipped AI-powered features using the OpenAI API and integrated Stripe and DocuSign, reducing manual workflow steps by **20%** across client products.
- Developed a shared component library and established reusable frontend standards for forms, state management, and UI, cutting new feature development time by **15–20%** across multiple products.

Projects

Multi-Region Website & Content Administration System

- Engineered the complete digital platform for a client operating across **multiple countries**, delivering a fully dynamic, SEO-optimized website powered by API-driven content management.
- Built a custom administration system enabling marketing and operations teams to manage content, promotions, and media assets across regions without developer involvement, cutting content update turnaround by **40%**.

Performance Assessment & Digital Reporting Platform

- Created a large-scale enterprise platform for managing dynamic assessment workflows, configurable forms, and structured performance data collection across multiple business processes.
- Produced interactive reporting dashboards, integrated scalable PDF generation services, and implemented AI-assisted note generation features, reducing manual reporting time by **30%**.

B2B Order Management & Workflow Automation Platform

- Architected a B2B platform that streamlined end-to-end order workflows through intelligent multi-step forms and dynamic configuration-based user journeys, reducing order processing time by **25%**.
- Designed reusable UI architecture and centralized state management, improving maintainability while supporting rapidly evolving business requirements.

Enterprise Workforce Training & Compliance Platform

- Delivered and maintained core frontend modules for workforce training, certification tracking, and compliance reporting.
- Improved dashboard responsiveness by approximately **~30%** while integrating secure APIs and delivering a consistent, accessible user experience across desktop and mobile devices.

Education

B.Tech Computer Science - Darshan Institute of Engineering and Technology, Rajkot

2019 – 2023

CGPA: **8.50 / 10**
