Summary

Software Developer with **3+ years of experience** building scalable web applications using React.js, Next.js, and TypeScript. Delivered frontend solutions for international clients across enterprise platforms, business management systems, and customer-facing products. Experienced in architecting maintainable frontend applications, integrating APIs and AI-powered capabilities, optimizing performance, and translating complex business requirements into intuitive user experiences. Comfortable owning the complete frontend lifecycle from planning and development through deployment in Agile environments.

Technical Skills

Core: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Frontend: Tailwind CSS, Material UI (MUI), ShadCN UI, Zustand, Redux, Context API, TanStack Query, React Hook Form

Performance: SSR, SSG, Code Splitting, Lazy Loading, Image Optimisation, SEO

API & Integrations: REST APIs, OpenAI API, GoogleGenAI, Stripe, DocuSign, Google Analytics

Tools: Git, GitHub, Figma, VS Code, Cursor, Jira, Trello, Docker, GitHub Actions

Testing: React Testing Library, Yup, Zod

Methodology: Agile, Scrum, Code Reviews

AI Tools: Claude AI, Cursor AI, GitHub Copilot, Lovable

Professional Experience

Software Engineer – Vivansh Infotech Pvt Ltd, Ahmedabad

January 2023 – Present

- Led frontend development across **7+ client projects**, delivering production-ready applications using React.js, Next.js, and TypeScript.
- Collaborated closely with designers, backend teams, and stakeholders to transform business requirements into responsive and user-friendly interfaces.
- Improved application performance and Core Web Vitals through rendering optimisation, asset optimisation, and modern frontend best practices.
- Implemented scalable SEO strategies, structured metadata, and routing solutions for customer-facing platforms.
- Built AI-powered features and integrated OpenAI, Stripe, and DocuSign to enhance application functionality.
- Established reusable frontend standards for forms, state management, UI components, and project architecture, improving consistency across multiple products.

Projects

Dip'n'Dip - International Cafe Chain Website + Admin Panel

- Developed the complete digital platform for an international cafe brand operating across multiple regions, delivering a fully dynamic website powered by API-driven content management.
- Built a custom administration system enabling marketing and operations teams to manage menus, promotions, locations, and media content without developer involvement.

Performance Assessment & Digital Reporting Platform

- Developed a large-scale enterprise platform for managing dynamic assessment workflows, configurable forms, and structured performance data collection across multiple business processes.
- Built interactive reporting dashboards, integrated scalable PDF generation services, and implemented AI-assisted note generation features to streamline analysis and reporting workflows.

PrintFlow360 - Print Business Management Platform

- Developed a B2B platform that streamlined print order workflows through intelligent multi-step forms and dynamic configuration-based user journeys.
- Designed reusable UI architecture and centralized state management, improving maintainability while supporting rapidly evolving business requirements.

SafetyTrack - Safety & Training Management Platform

- Developed and maintained core frontend modules for workforce training, compliance tracking, and operational safety management.
- Improved dashboard responsiveness by approximately ~30% while integrating secure APIs and delivering a consistent user experience across desktop and mobile devices.

Education

B.Tech Computer Science - Darshan Institute of Engineering and Technology, Rajkot

2019 – 2023

CGPA: 8.50 / 10
